

Group Name: _____

WHERE DO I COME FROM?

How to play:

- On the next page is a list of animals found in Australia. Your challenge is to name all of the animals that are native to Australia, without naming an introduced species.
- Stand in a circle around the room. The first person starts by naming a native animal from the list.
- The next person in a clockwise direction then names another native animal from the list and so on around the circle.
- If someone names an introduced species, or an animal that's already been said, start again from the person who made the mistake.
- Continue until you name all of the native Australian animals on the list. *Hint there is 15
- Count how many tries it takes you to get it right. Deduct this number from 20, this is your score for this round.
- Add it to your previous score and keep count!

Good luck!
