

Group Name: _____

WHO ARE MY FRIENDS?

How to play:

- In this challenge, every student will have the opportunity to name an animal, from list provided below, that's in the same class as the previous animal mentioned.
- We'll be using three animal classes today; Placental mammals, Marsupials and Monotremes.
- Start by reading an animal from the list, you then need to respond with another animal from the list that fits under the same class as the first one you read.
- For example, if you were read 'koala' you would have to reply with another marsupial, such as a 'wombat'. Or if you were read 'fox', you would have to reply with another placental mammal such as a 'human'.
- Everyone should get 1 turn each. And you receive 1 point for every correct answer.
- Add your total to your overall tally.

Good luck!

Group Name: _____

WHO ARE MY FRIENDS?

Koala

Cat

Wombat

Platypus

Wallaby

Camel

Kangaroo

Fox

Bat

Dog

Human

Sugar Glider

Possum

Whale
